PROFILE

Full Stack Developer (~5 yrs) who builds web platforms **end to end** — Node.js back-ends, booking engines and accessible front-ends. Grounded in **core JavaScript and engineering fundamentals**, and fluent across frameworks and CMS (Vue.js, ApostropheCMS): I reach for the right tool for the job and can build custom from scratch when it pays off. Sole developer of a live marketing + booking platform and contributor to **4 production travel platforms** across Switzerland, the Netherlands and Germany.

WORK EXPERIENCE

Full Stack Web Developer 2025 – Present

- Tour operator platform · sole developer
- Sole developer of a full-stack Apostrophe CMS platform — a marketing CMS and a travel-booking minisite — owning the Node.js back-end and front-end end to end.
 - Built a library of **33 custom widgets** (incl. a cinematic scroll-driven set) in framework-free vanilla JavaScript with hands-on DOM and component work.
 - Integrated Mailchimp, Cloudflare Turnstile and GA4 under a strict CSP; shipped structured data, SEO and **WCAG** accessibility.

Frontend Developer & UI/UX 2024 – 2025

- Tour operator platform
- Translated client vision into a fully functioning, accessible UI in vanilla JavaScript (DOM manipulation, custom components).
 - Raised the application's **SEO score by ~20%** through structured data and on-page optimisation.
 - Delivered Figma-to-code builds with modern UX patterns across the product.

Full Stack Web Developer 2022 – 2024

- Dutch dive-vacation platform · core developer
- Core developer across **~3 years and 800+ commits** (Apostrophe CMS, Docker, MongoDB), building custom widgets and working across the booking engine.
 - Built **form validation and API integration** across the booking engine: pricing, cabins, with/without-flight options, excursions and liveboards, plus destination search and multi-step forms.
 - Led a blog export and a full data migration (DW2 → DW4).

Web Developer 2021 – 2022

- Tour operator platform
- Built booking-software features in JavaScript: Splide sliders & galleries, cookie-based search-state persistence, and a **GDPR** cookie-consent manager.

OPEN SOURCE

Apostrophe CMS · AI Code Generator 2025

Built an AI-powered code generator for Apostrophe CMS modules using Claude AI and the MCP (Model Context Protocol) architecture. Published as an **official community extension** on the Apostrophe CMS website.
